The Power of Blue.®

The only all-in-one, portable, multiprocess power source from Miller is our most versatile machine to date. Weighing only 29 pounds (13.2 kg) and running on either 120 or 230 V, the Multimatic 200 can go anywhere you need to MIG, TIG or Stick weld.

NEW! Auto-Set™ Elite can be used on multiple materials and multiple processes with the ability to fine-tune your settings. Simple to set up and use!

Impact-resistant case provides strength and durability, protecting the internal components and welding wire.

Excellent arc characteristics! Multimatic 200 offers positive arc starts and an extremely stable arc with minimal spatter on both mixed gases and straight CO₂.

Multi-voltage plug (MVP™) allows you to connect to common 120 or 230 V power receptacles without the use of any tools—choose the plug that fits the receptacle and connect it to the power cord.

New!

Comes complete with:

- Power source
- Power cord and MVP plugs for 120 and 230 V
- 10-ft. (3 m) Bernard® Q150 MIG gun
- 13-ft. (4 m) lead with electrode holder and 25-mm Dinse connector
