Don't let heat exhaustion cause unnecessary injuries on the job. Our CoolBelt™ **lowers temperatures** underneath the hood **up to 17°F**.

Easily integrated into most Miller helmets*, the CoolBelt delivers the **maximum air flow** performance to keep welders going all day. Multiple air speeds with directional control provide air movement over the face and head, keeping the welder cool, removing stagnant air and **decreasing lens fog**.

Reduced head and body temperature keeps employees cooler, improving comfort and reducing heat fatigue.

* MP-10™, Elite™ & Titanium™ Series.

245230

Includes: CoolBelt™ unit with belt, hose, headgear with air duct, head shroud, four filters, rechargeable battery** and AC power adapter.

** Provides up to 5 hours of battery life.

We're redefining welder protection with products that provide optimal fit, comfort, performance and style, resulting in safer, more productive work environments. THAT'S THE ARC ARMOR™ DIFFERENCE.
